

ENVIRONMENTAL POLICY

ULMA CONVEYOR COMPONENTS S. COOP., aware of the environmental consequences that arise from the activity it carries out, and aware that it has the responsibility to transmit environmental values in the personal and professional spheres, has proposed the integration of environmental criteria into its company management strategy.

ULMA CONVEYOR COMPONENTS S. COOP. considers that, in order to achieve appropriate environmental management and sustainable development, the basic principles to be adhered to are pollution prevention and reducing natural resource consumption. Therefore, it will promote an environmentally friendly culture among all its personnel. This culture will be based on taking responsibility for the improvement of their environmental behavior and establishing measures to protect the environment on an ongoing basis.

To this end, the company intends to follow the guidelines of an environmental management system that will allow it to continuously mitigate its impact on the environment. Specifically, the company commits to:

- Integrate a culture of respect for the environment in all development, production and marketing activities of the company, with the collaboration and contribution of all its employees, using communication, training and information on environmental issues and management to raise awareness and participation.
- Show its commitment to society, complying with current environmental legislation and regulations, as well as with other requirements subscribed to voluntarily that apply to the activities of our organization. To this end, we have a system that allows us to identify, adapt and implement the applicable legal requirements and maintain a relationship of dialogue and collaboration with the Administration through its competent environmental bodies.
- Study and analyze activities that impact on the environment.
- Minimize environmental impact on an ongoing basis, with the help of objectives and targets, through the development of specific programs that allow :
 - The prevention and elimination of pollution, ensuring proper management of the waste produced by our activities,
 - Use raw materials and energy in a sensible manner, trying to save them as much as possible,
 - To control and reduce, to the best of our ability, our consumption of natural resources and production of emissions and polluting discharges,
 - Manage waste generated, trying to minimize it at source, reuse it, recycle it and, where this is not possible, dispose of it in the way that causes the lowest environmental impact.
- Disseminate the environmental policy among the people and organizations related to our organization, in order to make our commitments known and establish active collaboration to achieve them.
- Regularly review and update the environmental policy, objectives and goals so that they are appropriate to the nature, scale and environmental impacts of the activities carried out at ULMA CONVEYOR COMPONENTS S. COOP.
