

# PULLEYS

ROBUSTNESS AND BALANCE  
FOR EFFICIENT TRANSMISSION

# ULMA PULLEYS

Guaranteed transmission for your conveyor

## ROBUST DESIGN

High resistance to loads, frequent start-ups and sudden stresses during start-up.

## UNIFORM STRESS DISTRIBUTION

Critical areas of the pulley are not compromised.

## STRUCTURAL INTEGRITY ASSURED

Welded joints away from high-stress areas.

## HIGH-QUALITY COATING

The materials used and the coating process guarantee perfect adhesion to the pulley's exterior.

## CUSTOMIZED MANUFACTURING

Adapted to the customer's needs.

**DIAMETERS UP TO 1600 mm / SHAFT: UP TO 500 mm / LOADS UP TO 1900 kN**

## ULMA Quality

- Premium materials, processed to increase hardness and relieve stress.
- Pulley balancing for optimized performance and bearing life.
- Premium brand components.
- Calculation, sizing and design adapted to maximize performance.
- Rubberizing process subjected to adhesion tests.

## ULMA Technology

Solutions that maximize resistance, performance and adaptability to the conditions of each system:

- Detection of weak points.
- With strategically located welds.
- Optimized geometry.

## **ULMA, the Mining-Friendly company**

*Customized mining solutions*

### **We optimize the long-term efficiency of your systems**

1. We analyze your system to identify points of failure in rollers and other components.
2. We simulate breakage situations in our laboratory.
3. We will find the solution to optimize your system's performance.
4. We conduct monitoring to ensure the improvements made function correctly and to make any necessary extra adjustments.

### **Responsiveness**

We have strategically located our professionals and warehouses to ensure on-site support and a fast response to make sure your system operates at its optimal level at all times.

### **Experience and customized solutions**

With decades of experience in the mining industry, we offer tailor-made solutions designed to maximize your system's efficiency and productivity.

### **Proactive innovation**

Our process allows us to detect points of weakness and offer customized solutions.
